

# TICKET DISPENSER

## PT-TD2000/ PT-TD2001

The ticket dispenser provides the first impression when a patron enters a parking area. It is designed to meet to the requirement of unattended ticket dispensing and fulfill the variety of parking fee structure. Pro-Tech Parking ticket dispenser and exit station cater for various types of solution including Thermal Ticketing, Contactless Card, and Payment Card (Credit Card & Touch 'n Go). Its front is protected with a stainless steel panel for anti vandalism purposes.

The standard components that are available on the terminal are the ticket dispenser/printer, vacuum fluorescent display (VFD), ticket button and intercom. The ticket button will send indications to the printer to dispense the ticket, dispenser/printer prints out ticket on thermal papers, VFD provides the messages and instructions for the patron whilst the intercom is for communication between patron and the car park operator.

The terminal will be able to meet the requirements of other items including the pinhole camera to capture the face of driver, TFT display as replacement of the LCD display or as additional display for advertising purposes, contactless card reader for tenants or season parking and card payment reader for faster payment alternative.

### Key Features

- *Fast ticket printing with heavy duty ticket printer.*
- *Dual mode operation, online and standalone.*
- *Filtered air ventilation with dual heavy duty fan to prevent overheating.*
- *Economical ticketing consumables.*
- *Flexible options on features for future upgrading.*
- *Supports smart card dispensing.*
- *Supports multiple ticket type and parking rates.*
- *Logo and short messages display.*
